Art Unit: 1625

DETAILED ACTION

Claims 1-8, 10-13 and 17-29 are cancelled.

New claims 46 is added.

Claims pending are 9, 14-16, 30-46.

Claims currently under examination are 9, 30-34 and 46.

Claims withdrawn 14-16, 35-45.

Response to the arguments:-

The rejection under 35 USC 112 has been withdrawn as applicants have amended the claims and have provided several declarations.

The 35 USC 102 rejections under 35 USC 102 over WO 9408051 and Romauld Baudella et al has been withdrawn as applicants have amended the claim and also because claim 30 is limited to compounds with -CH₂R_a group which is absent in the compounds of the prior art and there is no motivation to modify it to have that substituent at that position.

The provisional ODP rejection are maintained as applicants have not provided a TD.

New Rejection

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1625

Claim 9 recites the limitation "of having an alkyl, CH₃, -SCH₃, OMe substituent on the R₆ phenyl. In the independent claim 30, these substituents are not there. Hence there is insufficient antecedent basis for this limitation in the claim.

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 46 is rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for the species, does not reasonably provide enablement for the "solvates" or tautomers thereof.. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to use the invention commensurate in scope with these claims.

Regarding solvates:- The claims are drawn to solvates, yet the numerous examples presented all failed to produce a solvate. These cannot be simply willed into existence. As was stated in *Morton International Inc. v. Cardinal Chemical Co.*, 28 USPQ2d 1190 "The specification purports to teach, with over fifty examples, the preparation of the claimed compounds with the required connectivity. However ... there is no evidence that such compounds exist... the examples of the '881 patent do not produce the postulated compounds... there is ... no evidence that such compounds even exist." The same circumstance appears to be true here. There is no evidence that solvates of these compounds actually exist; if they did, they would have formed. Hence, applicants must show that solvates can be made, or limit the claims accordingly.

The examiner had previously made this rejection, and the previous claims have been amended but the new claim was not corrected.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
